

Software Updates

In order to increase the security level of software applications, gain new ways of protection and prevent possible software/hardware conflicts you need to update the Guardant software on a regular basis.

Important information

Guardant SDK is available for free downloading from [Aktiv Company website](#)

Perform the following actions in order to update the Guardant software:

- Unpack the Guardant SDK archive
- Launch **GuardantSDK_7_0.msi**
- Choose the installation directory
- Click the **[Install]** button and follow the wizard instructions
- After successful installation, restart the operation system
