

Algorithm Properties

Algorithm properties dialog box serves for defining the properties of algorithms being created: a combination of flags, the size of the question as well as the set of services for algorithms.

'New Field' field propertiesData size (DEC): 92 bytes

Algorithm or Protected Item properties Algorithm determinant

☒ Depends on ID Question size (DEC): 8

☒ With counter decrease Counter value (DEC): 0

Available services	Passwords	Random or unified
☒ Activation	0	Unified
☒ Deactivation	0	Unified
☒ Data read		
☒ Password-protected reading	0	Unified
☒ Data update	0	Unified

Password entry attempts (DEC): 10
